SUBJECT INDEX

Abrasion
slurry abrasion of polymers under simulated submarine conditions, 135
Abrasive wear
an analysis of the influence of plastic indentation on three-body abrasive wear of metals, 123
Alloys
a microscopic study of the behaviour of selected Al–Cu alloys in unlubricated sliding wear, 225
Alumina
wear of an Al–Si carbide whisker composite, 151
Aluminium
a microscopic study of the behaviour of selected Al–Cu alloys in unlubricated sliding wear, 225
Austenite
effect of martensite and austenite on grinding media wear, 285

Bearings
adiabatic analysis of finite width journal bearings with non-newtonian lubricants, 63
analysis of pneumatic instability of an aerostatic rectangular thrust bearing with offset load, 1
chemical and microstructural changes induced in bearing steel by rolling contact, 363

Cast irons
the influence of acid strength on the corrosive wear of grey cast irons in oil–sulphuric acid mixtures, 343
Cavitation erosion
evaluation of epoxy resins in flow cavitation erosion, 77
Composites
lubricated wear of fibre-reinforced polymer composites, 13
wear of an Al–Si carbide whisker composite, 151
Copper
a microscopic study of the behaviour of selected Al–Cu alloys in unlubricated sliding wear, 225
Corrosion
the influence of acid strength on the corrosive wear of grey cast irons in oil–sulphuric acid mixtures, 343
Crack initiation
initiation and propagation of case crushing cracks in rolling contact fatigue, 33

Diesel engines
ferrographic examination of unused lubricants for diesel engines, 115

Epoxy resins
evaluation of epoxy resins in flow cavitation erosion, 77
Erosion
evaluation of epoxy resins in flow cavitation erosion, 77

Ferrography
ferrographic examination of unused lubricants for diesel engines, 115
Fibres
lubricated wear of fibre-reinforced polymer composites, 13
Fracture
fracture features of case crushing of carburized steel, 57
Friction
studies of the friction of polymeric materials, 313

Galling
a study of the galling of two steels using two test methods, 207
Gears
wear of involute helical and circular-arc gears (a comparative study), 103
Graphite
tribological examination of unlubricated and graphite-lubricated silicon nitride under traction stress, 183

© Elsevier Sequoia/Printed in The Netherlands

Grinding
effect of martensite and austenite on grinding media wear, 285

Journal bearings
adiabatic analysis of finite width journal bearings with non-newtonian lubricants, 63

Lubricants
ferrographic examination of unused lubricants for diesel engines, 115
Lubrication
lubricated wear of fibre-reinforced polymer composites, 13
tribological examination of un-lubricated and graphite-lubricated silicon nitride under traction stress, 183

Martensite
effect of martensite and austenite on grinding media wear, 285
Metals
an analysis of the influence of plastic indentation on three-body abrasive wear of metals, 123
Molybdenum
tribological performance of MoS_2 compacts containing MoO_3, Sb_2O_3 or MoO_3 and Sb_2O_3, 97
Molybdenum disulphide
tribological performance of MoS_2 compacts containing MoO_3, Sb_2O_3 or MoO_3 and Sb_2O_3, 97

Non-newtonian lubrication
adiabatic analysis of finite width journal bearings with non-newtonian lubricants, 63

Oils
the influence of acid strength on the corrosive wear of grey cast irons in oil–sulphuric acid mixtures, 343
Optical profiling
a new three-dimensional non-contact digital optical profiler, 301

Polymers
an investigation of the wear of polymeric materials, 329
lubricated wear of fibre-reinforced polymer composites, 13
slurry abrasion of polymers under simulated submarine conditions, 135
studies of the friction of polymeric materials, 313

Rails
analysis of rolling contact with kinematic hardening for rail steel properties, 267
Residual stresses
influence of microstructure and residual stress on the stages of case crushing, 45
Rolling
analysis of rolling contact with kinematic hardening for rail steel properties, 267
chemical and microstructural changes induced in bearing steel by rolling contact, 363
Rolling contacts
analysis of rolling contact with kinematic hardening for rail steel properties, 267
chemical and microstructural changes induced in bearing steel by rolling contact, 363
initiation and propagation of case crushing cracks in rolling contact fatigue, 33

Silicon
microstructure and tribological properties of silicon-ion-implanted stainless steel, 255
Silicon carbide
wear of an Al–Si carbide whisker composite, 151
Silicon nitride
tribological examination of un-lubricated and graphite-lubricated silicon nitride under traction stress, 183
Sliding wear
a microscopic study of the behaviour of selected Al–Cu alloys in un-lubricated sliding wear, 225
Slurry abrasion
slurry abrasion of polymers under simulated submarine conditions, 135
Stainless steels
microstructure and tribological properties of silicon-ion-implanted stainless steel, 255

Steels
analysis of rolling contact with kinematic hardening for rail steel properties, 267
chemical and microstructural changes induced in bearing steel by rolling contact, 363
fracture features of case crushing of carburized steel, 57
microstructure and tribological properties of silicon-ion-implanted stainless steel, 255
a study of the galling of two steels using two test methods, 207
Sulphuric acid
the influence of acid strength on the corrosive wear of grey cast irons in oil–sulphuric acid mixtures, 343

Three-body abrasion
an analysis of the influence of plastic indentation on three-body abrasive wear of metals, 123
Thrust bearings
analysis of pneumatic instability of an aerostatic rectangular thrust bearing with offset load, 1
Traction stress
tribological examination of unlubricated and graphite-lubricated silicon nitride under traction stress, 183
Tribology
microstructure and tribological properties of silicon-ion-implanted stainless steel, 255
tribological examination of unlubricated and graphite-lubricated silicon nitride under traction stress, 183
tribological performance of MoS_2 compacts containing MoO_3, Sb_2O_3 or MoO_3 and Sb_2O_3, 97

Wear
an analysis of the influence of plastic indentation on three-body abrasive wear of metals, 123
design criteria and correction factors for field wear testing, 165
effect of martensite and austenite on grinding media wear, 285
the influence of acid strength on the corrosive wear of grey cast irons in oil–sulphuric acid mixtures, 343
an investigation of the wear of polymeric materials, 329
lubricated wear of fibre-reinforced polymer composites, 13
a microscopic study of the behaviour of selected Al–Cu alloys in unlubricated sliding wear, 225
wear of an Al–Si carbide whisker composite, 151
wear of involute helical and circular-arc gears (a comparative study), 103
